

The Cody Universal 1/2 electric strike

Cody Universal 1/2 electric strike Ref.: 500.CT12.20

The Cody Universal 1/2 electric strike

The Cody Universal 1/2 door opener has been created through the inspiration of customer needs and the constantly development of our software. The benefit of this product is, to open a door and a gate. It is possible to store up to 50 different passcodes. For the first time, you have the possibility to program a passcode, which is only valid once. Therefore, it will be deleted automatically after it has been entered correctly. Depends on the customer, you can order additionally a module, which changes the alternating voltage to direct voltage.

Quick overview

- To operate one 12VAC electric strike and one garage door
- Supports the geba Bluetooth® keyboards without a Bluetooth® adapter board (Ref.: 906.A0CU.01)
- Passcode: The passcode is optionally a four to six digital numeral code, by which you operate your door drive unit. You have the possibility to store up to 50 different pass codes, which means that up to 50 different persons with individual pass codes can open the door.
- It is also possible to program a passcode that is only valid once and is, therefore, automatically deleted after it has been entered correctly. This function is also supported in the Cody Universal family from version 1.5.
- Transponder technology: possibility of connecting a reading unit for up to 765 transponders

Technical data

Supply voltage	230-240V AC
Output voltage electric strike	12V AC 800mA
Relay contact	2 x NO, NC, potential-free, 5A 250V AC
Accessories	RCA-module, transponder, rectifier for 12V DC electric strikes

Additional module for achieving direct voltage Ref.: 500.CTMG.20
